- Mrs. Bjork
- Room 114 & 113
- bjorjea@pewaukeeschools.org

Assignment Description: Combine 3 Texture

Using the images we shot in the outside and in the art studio combine a minimum of three images to create one final digital image. The final image should show evidence that you have changed 10 things from the original main image. These changes could include copying and pasting new imagery in, color adjustments, clone stamping things in or out of your image, working with levels or curves to adjust contrast or applying filters (use these sparingly).

LT: How do I compose an image with a digital slr camera and make a photograph instead of just taking a snapshot? How do I use Adobe Photoshop to merge images and create a unified single work of art through digital imaging and photography?

CC: Communications, Creativity, Critical Thinking

Specifics: Classwork is 70% of grade

- Make sure you save the original version of each of the images that you've used.
- You will be putting the originals into the share folder along with the final edited version.
- You will also be loading your final jpg onto the class wiki for critique.
- Make sure that the final image is convincing in terms of shading, lighting and subject matter.
- Selections should have smooth edges that look as if they really belong in the final image
- Once you have finished the image save it as a jpg called your lastnametexturefinal.jpg
- Reduce the file size to 150 dpi. and between 6 x 8 or 5 x 7 inches large. Save this reduced version and use it to insert it onto the wiki page.
- Save the original images calling them lastnameorig1.jpg, lastnameorig2.jpg and lastnameorig3
- Upload to the class wiki following the directions given on the site. <http://phsdigiphotobjork.wikispaces.com/Texture+Combine+3+Winter+2014> Create a wikipedia called A2 Texturelastname or B2Texture last name and Post your 3 original images from the texture series. Post your final combined image as well and label as the final. Make sure all of these images have been resized in Photoshop. Follow the directions on the WIKI for details on this. Make sure you name your page properly.
- Write an explanation of the 10 changes you made to create a final Combined 3 Image. Explain which compositional technique you used in the main photograph. Describe the texture you emphasized and any other elements and principles of design that you feel you highlighted. Explain how successful you feel you were with the assignment and any changes you would consider for next time.

Photo is DUE: A2.....2/27 & B2.....2/28

Sketchbook/Planning Requirements: 15% of grade

1. Set up your Diigo account including a profile picture so we can easily see who is in the group. Make sure you can see the group page, when you're logged into Diigo
2. Read and Text code the wiki page called [COMPOSITION AND FOCUS](#) Save all your highlights, stickie and comments into the Digital Photography Diigo group.
3. Read and Text code the articles linked on the wiki page. Save all your highlights, stickie and comments into the Digital Photography Diigo group.
